Pregnancy outcomes in HFE hemochromatosis: a prospective comparison with non-HFE-related and hematological chronic anemias. Women with HFE hemochromatosis have increased rates of pregnancy complications, including ectopic pregnancy and placental abruption. Pregnancy outcomes of HFE hemochromatosis patients have not been compared with those of hematological and non-HFE-related anemias. Of 64 women with HFE hemochromatosis undergoing 163 pregnancies (starting in 1985), 27 pregnancies were carried to term. Maternal serum iron levels in HFE hemochromatosis patients, anemias, and

normal pregnant controls were compared with respect to their mean (+/- SD) total iron binding capacity (TIBC), serum ferritin, and transferrin concentrations. The rate of placental abruption and placenta previa was higher in HFE hemochromatosis patients than in hematological and non-HFE-related anemia groups (relative risk [RR] = 4.6, 95% confidence interval [CI] = 1.3 to 16.8; and RR = 5.7, 95% CI = 1.7 to 19.3, respectively). Similarly, the rate of ectopic pregnancy was higher in HFE hemochromatosis patients than in hematological anemias (RR = 4.0, 95% CI = 1.3 to 12.7). Transferrin concentrations were higher in HFE hemochromatosis patients and anemias than in normal pregnant controls (P

changes. **Creation of Geometric Key Frames** Quickly create key frames for the geometric properties of your drawing. With key frame, you can make changes in your drawing without changing the coordinates of geometry in the drawing. (video: 1:15 min.) You can use multiple geometric properties in a single key frame: angle, distance, or centroid. To easily navigate through your key frames, you can add a view to the viewport. (video: 1:26 min.) You can select a view directly from the Markup View's toolbar. From the View menu, choose Change View. You can create, edit, and delete geometric key frames from the Markup view toolbar. Choose the Key frame tool from the toolbox, then press and release the Edit key. Your changes are automatically reflected in the geometry. You can return the view to its original state with the Reset command. To reset the view, select Reset. (video: 1:20 min.) You can easily navigate to any view or sketch in your drawing. To do so, you select the view or sketch, then select Reset View. You can select a view directly from the View menu. From the View menu, choose Change View. You can also select Reset View from the Markup View toolbar. You can store a view as a sketch. You can later use the Draw tool to add geometry. If you want to sketch just one piece of geometry, you can use the Markup View's Table of Contents (tooltip), and its icon in the Markup View toolbar. (video: 1:27 min.)
