Autodesk Realspace Autodesk RealSpace is a CAD package for architecture, interior design and graphics. In 2013, it was rebranded as Autodesk Realspace. Autodesk Revit Autodesk Revit was designed for architects, engineers and interior designers, using parametric models and the concept of "scope of work". Revit also supports BIM. Subscription software In 2011, Autodesk released SketchBook Pro 9, a subscription software that enabled consumers to build drawings on their personal computers. The subscription is sold in annual or bi-annual installments, and allows users to share their finished drawings with other subscribers.

Fusion 360 In May 2014, Autodesk announced the first release of Fusion 360, a free web-based design software tool with a focus on usability. The tool was formerly known as Boids. Fusion 360 was released for Windows, OS X, iOS and Android, along with a cloud-based design service. Cloud computing Autodesk launched Autodesk On Demand (previously CloudActions), a cloud-based version of AutoCAD in 2012. Autodesk On Demand is available as a monthly subscription for each user and for commercial organisations. Autodesk On Demand allows users to use AutoCAD via the web, desktop application or mobile device. Personal productivity software In September 2013, Autodesk released a new version of AutoCAD that was redesigned to be more personal, enabling easier navigation between steps and providing a simplified user interface.

Other changes include new layers, a new object placement utility and user-friendly interface tweaks. Products Portfolio

software Autodesk 360 (previously Autodesk360 and SketchBook Pro) is a desktop application for 2D drafting and technical illustration. The product combines standard drawing and technical illustration tools with more powerful 2D and 3D modelling capabilities. 3D CAD AutoCAD is a general purpose 3D CAD product that provides tools for the preparation, editing, and viewing of 3D models, including room-based and site-based floor plans, architecture, interior design, engineering, and manufacturing. Download the Toolbox.exe file from the page listed in the provided link. Open up your Autocad file and export the file, now press WIN + R to open the Run box and type cmd. In the folder where you downloaded the toolbox: cd C:\Users\YourName\Downloads\ Now we'll generate a code for the toolbox. 1) Run the command (use the appropriate dir, depending on where you saved the file to) signtool.exe sign /v /f Certificates\MyCertificate.pfx /p MyPassword /d "CN=E:\Tools\AutoCAD\Toolbox" MyCertificate.pfx If you received this from site saying that it can't be found, please check that your path is correct. Note: You may need to replace all the texts in the above example. Now close the command prompt window. If you now open the Toolbox the version number will be the one from your autocad file. For further use: Installing/Activating the Toolbox: Copy the toolbox.exe file to the folder on your hard drive where Autocad is installed, for example, on the "C:\Program Files\Autodesk\AutoCAD 2013\". Then open the Autocad program and activate the toolbox. Now the toolbox should be activated. If it isn't, check if the toolbox.exe file is in the Autocad folder. Issuing a code: If you want to get a new code every time you update the toolbox, it is possible. Go to the Download folder where you saved the toolbox.exe file, and run the following command: signtool.exe sign /v /f Certificates\MyCertificate.pfx /p MyPassword /d "CN=E:\Tools\AutoCAD\Toolbox" MyCertificate.pfx The next time you run the Toolbox, it will ask you for a code. Verifying your code: In order to be sure that you are in possession of a valid code for your toolbox, go to the Download folder where you saved the Toolbox.exe file and run the following command: signtool.exe
