
Bejeweled Deluxe Torrent

The goal of the game is to score as many points as possible by swapping adjacent gems to create sets, horizontal or vertical, of 3 or more identical ones. After all the lines are filled, the game moves on to the next level. Gems are rectangular and have a size of 3x4. Each set contains three gems of one type and one gem of another type. There are no "golden" gems in the game, each gem is inherently unique. Each level has several gems that have the same value. But not all gems are equal in value.
