### What's New In?

DIGG THIS The passing of the "Patriot Act" and the expansive powers it grants to law enforcement appears to have little impact on what is actually going on in America. Since its passage in October, it seems as though the government has only grown bigger and more powerful, most recently with the introduction of the "Homeland Security Act." Yet, as troublesome as the law's provisions are, they don't seem to be breaking any laws (as long as you comply). According to Townhall.com, the most significant effect of the Patriot Act is that it allows the Department of Homeland Security (DHS) to expand its use of the country's 50,000 federal agents and to "surreptitiously acquire private communications." Other notable changes include the authority to act as judge, jury, and executioner for anyone who the government perceives as a terrorist suspect. Critics of the act worry that people are already being arrested and detained (and even assassinated) on the mere suspicion of terrorism without proof. The reason the government is able to pass new laws without the inconvenience of running them by Congress is because the Supreme Court has allowed the government to expand its role in the Constitution. In a case called Hamdan v. Rumsfeld, the Supreme Court ruled that the president has the absolute authority to declare war, effectively trashing the clause that says that war can only occur with the authorization of Congress. Also, under the Bush administration, the government now has the authority to "interpret" the Constitution and "implement" the laws by executive decree. Consequently, the war on terror has been allowed to run rampant and the Patriot Act provides a legal foundation for it to continue. So then, what we have is a government that can make "permanent war on terror" for as long as it wants, without Congressional approval, and it's headed by a president who can declare any war or even a selective type of civil war whenever he sees fit. In the past two days, President Bush has launched operations against several countries that have little or no ties to terrorism, including Iraq and Afghanistan. Just last week Bush gave an interview to the Atlantic Monthly in which he stated that the Iraq War was to simply "disarm Saddam Hussein." But if the war on terror has taught us anything, it's that one person's freedom fighter can
