More particularly, the invention relates to a motor vehicle fuel supply system comprising a tank for accommodating fuel, a supply pump operable to pump fuel from the tank and a fuel filter arranged in a fuel supply line between the pump and the tank for filtering the fuel pumped by the pump. Heretofore it has been known to arrange the fuel filter in the supply line between the pump and the tank. This arrangement has been used to avoid the need for a pressure switch for providing an indication of pressure in the tank, it being an object of this arrangement to avoid increasing the cost of the fuel supply system. It has been found however, that the filter material has a tendency to build up in the supply line after prolonged use or operation, and tends to increase the pressure drop in the supply line, thereby adversely affecting the supply of fuel to the engine.Q: The "My Company" tab in "Information About Your Profile" is confusing I just read this comment.
