www.instructables.com/id/korg-pa-50-practise-your-korg-pa-teknikal-w/) By: Yuqi Chen Get the free app: So I've been wanting to get a Korg PA 50 for a while, but its always been super expensive for a single player keyboard. So I went out and ordered a used korg kpc60, but it ended up being bigger than the PA 50 and I had to order a kpc65 from newegg, and I've never had good luck with kpc65's before. That's when it hit me! Why not go old school? You know what the answer is, a cheapy plastic ritmo keyboard from china. So I made this, together with a quick tutorial on how to build your own. Let me know what you think in the comments below! Feedback is AWESOME and helps me make better content. Edit: Forgot to mention, this keyboard can support the use of a real grand piano sound. Just download and install the more sounds app from the RITMO FOR KORG PA 50 DESIGN INSTRUCTIONS link below. It's free! Thanks for watching! Please give the video a thumbs up if you like it and the video Subscribe to my channel for more awesome videos like this!
