REVIEWS mFPA game: \*\*\*\*\* ■ Trajectory: A Mysterious Town- By-Town "L" Play Adventure [Play Style] The world of fantasy is beyond everyone's imagination. In these fantasy settings, there are lots of things that cannot be explained. But there is one thing that is explained by the fairy tale of the fantasy world. And that is the "trajectory". The "trajectory" is a set of underground tunnels that connect various locations. And it's said that in ancient times, when the world was being prepared for the next world, the underground passages were built to send messages and supply the most important things needed to the next world. But now, with modern technology, the underground passages have become the hideaways of thieves. I'm sure that you will be caught off guard when you start a new game in a town you've never been to before. So if you want to get a feel for what kind of game your hometown will be, you can try the "play by-town play style" and follow the "trajectory" and have an adventure. [Trajectory] I can help you on your journey.

---

You can “follow the trajectory” by tapping the markers located on the map. The markers will look like a plus-shaped arrow sign. When you tap these markers, the next town will appear on the map. Tapping the “New Game” button will start the game for the first time. But there are some limitations to this mode. The first is that you can only go down one floor at a time. And the second is that you cannot travel to another town on your own. You will have to move the markers to connect to another town. So in order to go down a deep underground passage, you'll need to tap the markers twice. Also, if you go too far down one level, you'll find an “End Game” marker. When you find this marker, your game is finished. Once you reach the “End Game” marker, tap the “New Game” button again to go bff6bb2d33

**"Oasis" special Collaboration event to be held at The Rocket Combat forum (devotion sake) Posted on 3/18/2011

**Thanks for the info, please note my account is a rocket-combat.net one, and so is my email address. Also I have this problem like back in the early days of corsair, corsair 4, corsair 5, capo and the like, when people said RS was outdated and they could use the new engine, people complain they are outdated. I can understand that. That's why I'm glad to see game stay trying to improve every time. I also feel that an old engine design to make a newer design is not advisable because it still needs that time to polish the engine. I think now the engines are at a good point where i don't see a reason to**
