When you first start Photoshop Elements, you won't see a project called "Edit all" in the Files drop-down menu. The first thing you'll see is a button for creating a New Document, or an existing document that you can edit. You can choose any size document and work within it. If you're using an iPad, the New Document button lets you start a new document with the screen size of your iPad. You can also choose a photo as a template to use as your starting image, or one of the built-in templates, which include a purple flower. You'll also see options for

turning on Acrobat (page-layout) and layers. Here's a look at the features of Photoshop Elements: You can use the keyboard shortcuts and the menus for editing and deleting, moving, rotating and duplicating elements or layers. You can customize the keyboard shortcuts and the menus. You can create your own keyboard shortcuts and menus. Here's how to edit an image in Photoshop Elements, with step-by-step instructions for basic editing tasks. Step 1: Open an image If you're not sure what to edit, and you're learning as you go, or if you want to learn a particular editing technique, start with the photo you want to edit. If you're working in Photoshop Elements or another program that you have on your Mac, hold down the Command key and select the photo you want to open from the Files drop-down menu. If you're working with an iPad, press Shift-

Command-2. The first thing you'll see after you open the photo is a Text layer containing the name of the image. This Text layer is there to help you find the photo again later. You can drag the Text layer or the entire photo around by the handle. You can also resize the photo by dragging the edges of the image. You can choose View by clicking the arrow in the lower-right corner of the photo window. You can choose View again to change the canvas size to how much of the photo you can see at one time. This is perfect for picking the area you want to edit. Step 2: Zoom In and Out You can zoom in by dragging the lens in the center of the image window. You can zoom out by dragging the lens in the top-left corner of the image window. You
