You are the heir to a small principality - now it's up to you to succeed, or fail, in playing the most complex medieval simulation game ever made. Don't get caught dead in bed with your mistress, lest the barons rise up and make you their puppet. Befriend the right people, foment revolt with your rivals, marry the heir to the throne or her sister, or, like the current ruler, embrace your homosexuality, surround yourself with trusted friends and brutal enemies, and war might be yours. In the early days, the Principality of Renfels is stable, prosperous, and democratic - but its neighbor, Ghelspeth, grows stronger, and rebel lords set up a rival government. Can you bring stability to Renfels with or without your father's blessing? Will a usurper claim the throne for himself? What about the other heirs? Can you control them all? Can you control yourself? Key Features: The most complex, rich, and dynamic political game ever created - laid out in grand graphical novel form! Hundreds of characters, dozens of political parties, and thousands of events to interact with as you shape the history of your principality Include the entire history of Renfels in its first four hundred years, or start a new game with the history of the more recent past Mastered realistic medieval politics, trade, and economics - and a 3D world map to see how your actions ripple across the land Play in real time or take your time to meet the demands of this complex and challenging sim If you want to experience a more detailed and detailed version of Renfels, you can buy the DLC, Crusader Kings II: Deleted Scenes. Incentives We've been showing off a lot of new content and features this week! Some of you may have already seen this, but we wanted to share some of the new stuff below: 1) Biography, free We know that some players love learning more about our characters, the

events of their pasts, and how they got to their current positions in the world. We thought that it'd be a shame if, after all that, we only showed them to you once you've unlocked them. So we're working on a feature that will let us enable more biographies, with much richer text, whenever you open the character info screen for a character. We know that we're

Chronologically: Committing betrayals in Crusader Kings 2

Playing Crusader Kings 2: Of course, no hack can force you to play the game its own way without unintended consequences. Undesirable matches, betrayals that are scripted on you, ruined empires or even the failure to pick the greatest leader on a given turn. There is no way around that unless you change the game mechanics and use a different game style.

Know your opponent, know yourself - ultimately it comes down to strategy.

In my extensive writings regarding issues involved in playing Crusader Kings 2, the most often discussed aspect is the effect of playing the game first as a loyal follower of your feudal lord. This has been an endless debate and some things have been misunderstood way too often and exist quite a bit in Crusader Kings 2 scenario campaigns. There were the discussions over the topic and no definitive answer has been given. The reasons for such difficulties lie in the fact that Crusader Kings 2 is not a turn based system but a semi-cooperative game where often a player with some early experience has more options than the other, which can hamper each other. In the end, you need to use the same tools in different ways

Music - Crusader Kings II: Pagan Fury - Warrior Queen Crack

Warrior Queen - Crusader Kings II: Pagan Fury is the musical score composed by Daniel Kayser and performed by the Orchestre

Connaisseurs de la Musique. Track 5 - Combat in Prison is a cover version of the song written by Daniel Kayser and performed by Shane Dubuisson. Track 8 - The Inquisitor Track 9 - Mailed to the Abyss is a bonus track included with the Deluxe Edition of the game. Track 10 - Stage Fright is composed and arranged by Bill Conti. The song was originally performed by Jody Watley, and it was first released on his self-titled album in 1984. Track 11 - Feast of the Dark God is a bonus track included with the Mythology Edition of the game. Track 16 - Viking Warrior Dance is arranged by Steve Souza. The choreography is from a play named The Vikings by Michael Berger. The piece was first performed in the US on December 9, 2008 at the Minnesota Music Theatre in Minneapolis. Track 17 - En Trapped on is composed by Daniel Kayser. It is a cover version of the song written by Guy Haberl and performed by Jefferson Starship. We have a passion for tactics, especially Crusader Kings II, so we decided to make our own Crusader Kings III soundtrack. Now we want to share our passion with you. We are looking for players to add videos to our soundtrack on Youtube. Don't feel shy to contact us with your video creations and send us the link to your videos, tell us about your clan, your situation or you have anything that is worth showcasing. We're really looking forward to seeing your Crusader Kings III videos. Music - "Pagan Fury - Warrior Queen" So whether you are a Pagan or Christian deity, the key to getting yourself named an official holy knight is the easiest it's ever been. Unlike other historical events, choosing your name of god is unrelated to the game. You can call yourself the worst thing in the world if you want, because we're going to never tell anyone. Just to make it easier for you, this tutorial will be done in the most layman's terms and only for characters that are 100% sure to get access to an "heir". First off, let's take a look at the chapter selections in each plot line. You get a choice to be either a Roman, Dacian, Goth, or Hunnic. A Roman or Dacian has no plot line options. The Goth and Hunnic plots are pretty much the same for each other; the Hunnic plot line has one particularly notable difference where you must switch to Hunnic religion. We will first start off with a basic look at the Hunnic plot line. If you're not sure if you want to be a pagan, then there is a good chance that you should switch to Hunnic. You can be part of a dynasty that never falls into Christian hands, and will most likely die out just as your family is chosen to be an holy knight. This will be a bit of a simple explanation. You are a head of a Roman dynasty. Things have been going swimmingly for your family, but one day your daugher, Reronna, is kidnapped by the Hunnic tribes. You can move your dynasty to Hunnic territory, and be the leader of a mighty dynasty. The Christians are on the defensive, and the Huns

are making inroads. The only snag is that you and Reronna are both Christians, and can't marry. Thus, the only way to have a happy, healthy marriage is to switch to Hunnic. Once you are converted, you are able to send Reronna out of the game (and keep her safe) and marry a Hunnic noblewoman. I know many of you thought this was well tought, but we'll get to that in a moment. In order to change religion, click your character portrait. Once you are done your religion will change, and you will receive a new, appropriate icon for

What's new in Music - Crusader Kings II: Pagan Fury - Warrior Queen:

Censorship I'll report on the results once I've got a chance to take some of the mod itself into account What can I expect? Over-imposed bias against the setting/culture? A bias against Pagan? As in 'Pagan', and not as in Dark Souls? Sure, you may find an occasional sentence that on first glance might seem to be a reference to the narrative, but it is often just a throwaway remark. And even if it does refer to the narrative it might not be a big deal, so just dig down to the text with context and you're fine. A bias against the Slavs? Paganlike, but just with demons? Not following the main narrative enough to detect it? As above, dig down to the text. Censorship? For all the game states that you can't, well, to do anything except "horribly offend people" Every attempt to subvert, alter or remove the rules was removed. In Warriors Crown there have been some attempts to subvert the slave trade by, for example, having yourself a slave caravan with three slaves whilst all the other unions have had two. Doesn't happen in any year after 1000 and up to 1050. Many of the houses we do develop in the

game adopt a Peleshe style of leadership and occasionally, but somewhat rarely, somebody like Boleslav made an attempt to put someone like him in charge. Amalgrega's Son Bağıran Khan Boleslav Murra II Poles II Poles II Ulrich of Zähringen Ulrich II Ulrich, Duke of Carinthia Yorpes II, Duke of Carinthia The following changes were made on the side of the player: In Medieval Total War again, historically based console set-ups and technology weren't available in those years. As a result we intentionally implemented a console (and game guide) more compatible with modern sets. Simulations will automatically upgrade those into modern systems when you activate the mod. We've made some alterations to the game rules. In-Game: Added display of rulers and leaders in-game and a centered 'selection list' of all your leaders (going forward, rulers). Old game
