Celestial Flora

It was the last thing he saw before he was blinded.

The shining sun must have blinded him, because now he is standing in the middle of a village frozen in ice.

He should have known better. He had only this one chance and a scroll for luck.

Those were his only things in this dungeon...

Around him the village is frozen. There are not even a sign of life from people.

The tile he needs is hidden in this dungeon, so he has to get out of here first.

He has only one hour left and needs to use this chance to get out of this dungeon!

Before this hour is over, this dungeon will be ice forever, so he should be careful what he does.

Start of the game! To be able to play, you must enter the labyrinth! As soon as you are in, look for your first objective "Find the key." You will find it when you get to the magic tree, so head on that way. Talk to the priest at the entrance of the labyrinth and talk to him to get the key. Walking through the labyrinth is not that hard, but some monsters have moves that are very easy to avoid. When you get to the key, check the chest. Go back and talk to the priest, but don't open the chest. Go back again to the key and check the chest. You'll see it's empty. Go back again and talk to the priest, and head to the chest and talk to it. And as you open it, you'll get the elemental rupee. Talk to the priest and enter the inn. Enter the inn and talk to the owner. Don't spend the elemental rupee yet! Go to the area where the demons were defeated and talk to the owner. It says to give him 500 and then the owner will give you the quest "I'm very hot!" Go and pick the quest! You can't pick it up until you talk to the owner again. To enter the hot spring, talk to the owner. You can't enter the hot spring yet. Go to the area where the demons were defeated and talk to the owner again. The owner wants to challenge you to a hot spring battle. This can only be done in the hot spring, so you have to go there. After you defeat him, go to the hot spring and go in the pool. You'll see your map and you'll know that there's only one more quest to be picked up. After you pick up the quest, talk to the owner again and he'll give you "A Demon's Bane" and "Devil's Alliance". "A Demon's Bane" can only be picked up in the hot spring, so you must go there and pick it up. "Devil's Alliance" can be found anywhere. Just go and find it. After picking up these quests, talk to the owner again. He will now give you a hot spring armor and a hot spring hat. You can't wear these at the moment, so keep it as is for now. A woman will now give you a quest "Eco Day". Go to the hot

Maker here, as usual. Initially, I started this as part of my Master's project. Later, after I had completed my Master's I realised that I had wanted to use KR Elemental Dungeon Tileset, so I decided to remake the maps in the by the way, random generated visual novel style. The only difference is the "Ice Time" subtitle and an extra title (which I also thought of at the last minute). I hope you enjoy my work. Random Generated Visual Novel Style, Ice-Time Darkness inside the start of a long, cold night. Facing the blackened, icy forest of Krime. Explorer Krime is being hunted down by the demonic evil. The nightmare starts. Time is running out. Base Price ₹27.99 (Shipping) 100K+ Sales Interact with all NPC using spacebar More Info at ETSY Read RPG Maker MZ Tutorial here.. >1. Field of the Invention The present invention relates to an input buffer circuit comprising a transistor and a bootstrap capacitor connected to the gate terminal of the transistor for supplying high drive power to a load circuit in a state of a high impedance state. 2. Description of the Related Art FIG. 6 is a circuit diagram showing the structure of a conventional input buffer circuit. In FIG. 6, an NMOS transistor M1 whose gate terminal is connected to a first input terminal Vin1 and the source terminal is connected to the power supply Vcc, a PMOS transistor M2 whose gate terminal is connected to a second input terminal Vin2 and the source terminal is connected to the power supply Vcc, a diode-connected NMOS transistor M3 whose drain terminal is connected to the gate terminal of the NMOS transistor M1 and the source terminal is connected to the power supply Vcc, and a bootstrap capacitor C1 are connected as an impedance to each other. Hereinafter, the function of the input buffer circuit shown in FIG. 6 will be described. When the input terminal Vin2, to which a high level signal is inputted, is high, the gate terminal of the NMOS transistor M2 is kept at a high level. The PMOS transistor M2 is thus turned on. Through the PMOS transistor M2, a current is supplied to the bootstrap capacitor C1 from the power supply Vcc, so that the voltage at the gate terminal of the NMOS transistor M1 is raised. This NMOS transistor M1 is thus turned on. On the other hand, when the input terminal Vin2, to which a low level signal is inputted, is low, the gate terminal of the NMOS transistor M2 is in a high impedance state and thus the NMOS transistor M2 is turned off. This causes the
