Amibroker 5.6 Work on all Mac OS X V10.8Â .Q: Android - WebView -
How to tell if the app is online or offline? I have a webview in my android
app, which updates itself with data from the server. I load the webview
dynamically. I want to show a toast message on app startup, stating
that the app will be connected or disconnected depending on if the app
is online or offline. How to detect if the webview is online or offline? I
tried doing this: @Override public void onCreate(Bundle
savedInstanceState) { //super.onCreate(savedInstanceState);
super.onCreate(savedInstanceState);
setContentView(R.layout.activity_main); ... webView = (WebView)
findViewById(R.id.webView);
webView.getSettings().setJavaScriptEnabled(true); webView.loadUrl("");
} But I don't know which method is the best to use in order to check if
the webview is online or offline. Thank you. A: have you tried using
ConnectivityManager? if (mConnectivityManager.getNetworkInfo
