The \$14.6 million planetarium is funded by a gift from the Norman B. Pierce Foundation, the OU Science Center Endowment and investment income. The planetarium will provide students, faculty and the OU community with a unique experience that allows them to explore the universe and space. Within the planetarium, there will be eight large-screen, surround-sound displays that feature animated images, animations, and video. The planetarium will provide students, faculty and the OU community with a unique experience that allows them to explore the universe and space. The planetarium construction was completed this year, and public use started in May of 2017. David Johnston, OU Science Center's director of the OU-Libraries, oversees the daily operation of the planetarium. The planetarium is currently open to the public and volunteers are needed to staff the exhibit daily. The museum's planetarium component is administered by the Oklahoma Museum of Science and Exploration (OMSE). OMSE manages the planetarium department and operates the planetarium nightly and during special events. Also on the docket for this year's OU Science Center include the construction of a new riverfront park next to the Campus Greenway, which will offer students and visitors a beautiful green space to stroll, bike, run, and enjoy the outdoors. Construction began last fall. The Science Center continued its commitment
