A quick tour of the inside of an imaginary car With all of the talk about the technical prowess of the Tesla Model S and other luxury EVs, it seems that the search for a performance EV has become a bit obtuse. As such, we imagine that if you're still looking for a vehicle that can give you a bit of go around the top of the scale, that you may be considering the small, gas-burning compact. Now you can run interference for yourself, as we have made an admittedly rudimentary video explaining what you might see when you look inside of one of these tiny sports cars. It's an interesting look. No, seriously. The video was made for an EV race series taking place in Spain this year, so the panning motion we see around the vehicle makes a little more sense. Either way, we see less of the engine and more of the gearbox and differential, with a little look at the brakes, suspension and steering system. The amazing thing is that the engine is more or less at the back of the vehicle, and that there is a fairly large center of gravity. It's a little hard to make sense of it all, since we don't really know what vehicle it is, although it does appear to be a vehicle built in Spain. And though the video has some issues, it's actually pretty solid on the rest of it, which is likely all that really matters. { "images": [{ "idiom": "universal", "filename": "SearchPressed@1x.png", "scale": "1x" }, { "idiom": "universal", "filename": "SearchPressed@2x.png", "scale": "2x" }, { "idiom": "universal", "filename": "SearchPressed@3x.png", "scale": "3x" }], "info": { "version": 1, "author"
