Peptides corresponding to the sequence of the C-terminal fragments of human epidermal growth factor (hEGF) and to the first five amino acid residues of hEGF have been synthesized. The ability of the peptides to activate MAPK ERK1/2 in human fibroblasts was examined, and four peptides were selected for further study based on their biological activities. We investigated the effects of replacement of amino acid residues in the peptide and the N-terminus on the biological activities. The biological activities of the peptides were determined by their abilities to promote morphological differentiation in NRK52E cells, to induce activation of ERK1/2 and c-Fos in COS-7 cells and to bind to the EGF receptor in cultured cells. These results showed that (i) the peptides containing Glu-Glu-Lys-Pro-Arg were more active in vitro than the hEGF and other peptides; (ii) the first amino acid residues of the peptides had an important role in biological activity; (iii) the peptides with an N-terminus-C-terminus sequence different from that of hEGF had similar activities as the hEGF peptides. These results suggest that the C-terminal sequence of the hEGF does not play an important role in the biological activity of the hEGF. Cauchy conditions The Cauchy conditions can be formulated in different ways. In the following discussion, we will use the notation af5dca3d97

Barry Bonds, the career home run leader, will not be indicted by a federal grand jury, prosecutors said today, and the San Francisco Giants will not get the record for a single season. Bonds is accused of his fourth such investigation in two years. Prosecutors were unable to convince a federal grand jury that there was sufficient evidence to support an indictment in the previous three cases, and they are unlikely to be successful again. Bonds is accused of obstructing justice, giving false statements to federal authorities, and failing to truthfully answer questions from the grand jury. He pleaded not guilty to all three charges in June, when a grand jury in San Francisco indicted him on all counts. He was then released on \$3 million bail. Today, the Los Angeles County district attorney, who also had been investigating Bonds, said it had "decided not to prosecute" Bonds, and he said it was possible the grand jury would indict Bonds in the future. A federal prosecutor, however, said the grand jury "has no intention of charging him." Bonds has been accused of using performance-enhancing drugs and has been investigated by federal authorities as part of the BALCO steroid investigation. Several reporters and bloggers noted today that the Oakland Athletics' season-ending record for the most home runs in a single season was not broken, as the Giants had claimed in their press release, because of the San Francisco Giants' mark of 73 home

Automatically assess the integrity of imported objects. Verify the validity of imported objects, including such things as rules, text, dimensions, text, annotations, dimensions, blocks, and custom objects. (video: 1:15 min.) Share interactive drawings: Animate a drawing created in AutoCAD without exporting to video and share it with your colleagues, with the web, or as email attachments. (video: 1:30 min.) Explore the ribbon palette. Find the command you want to use with a quick mouseover, even if the command is not visible on the ribbon. (video: 1:30 min.) View the ribbon palette in grid, text, and alignment mode. Review the Ribbon display mode. Edit the ribbon display mode to show more or fewer controls or commands. (video: 1:15 min.) View the ribbon palette with transparent background. Make the ribbon color, tooltip color, and selected ribbon color customizable. Choose a transparent background for the ribbon. (video: 1:15 min.) Schedule the next automatic project. Collaborate with a colleague by sharing a drawing and setting a deadline. In CAD scheduling, you can define the amount of time between when a drawing is opened and the time the drawing will be closed. (video: 1:20 min.) Use a common legend across all layers. Draw the same object on each layer in a drawing, and use a single legend to show the object's properties on every layer. (video: 1:15 min.) Track changes in an existing drawing. Track changes made to existing drawings and automatically include these changes in new drawings. (video: 1:15 min.) Be bold with measurements. Set rulers to be made of individual pixels, so you can measure with any precision you require. (video: 1:15 min.) Add a comment to a layer. Add comments to layers for tracking and identifying the source or nature of a drawing. (video: 1:20 min.) Identify points using circles, squares, and triangles. Draw circles, squares, and triangles on an existing layer, or add them directly to a drawing. (video: 1:15 min.) Measure accurately. Snap to grid (text and point) for quick and accurate measurements. (video: 1:15 min.) Create paper curves. Easily add a curve to a drawing, and set
