I want to add the window content to an array. I have tried writing a function that does this and returns an array with the data. The problem is that the window function is not running at the same time as the main function. How can I have the window show up every second and then have it added to the array? import tkinter as tk from tkinter import * def add_win(): #Add the win to the list of windows console_win = add_array() window_list.append(console_win) #Show the win MainWindow.update_idletasks() class MainWindow(): def __init__(self): window_list = [] self.label_subject = Label(self.root, text="Subject") self.label_subject.grid(row=0, column=0) self.label_verb = Label(self.root, text="Verb") self.label_verb.grid(row=0, column=1) self.label_object = Label(self.root, text="Object") self.label_object.grid(row=1, column=1) self.sub = tk.IntVar() subject = tk.StringVar()
