
Download Free Baidu Anti Virus !!BETTER!!

Download

you can select a range of sites for proactive scanning, like only those on your home network and those in the cloud. baidu's proactive scanning is better than that of some free tools. it reports fewer false positives and reduces the chances of your system being scanned by unwanted sources (the latter of which isn't possible with third-party scanning engines). baidu can also block external sites, including those that try to host malware on their pages. the interface is clean and unobtrusive, and it's easy to navigate even if you're new to antivirus software. you can save multiple profiles for different work and home networks, so it's easy to switch between them. the software is free, and it has all the usual features, like the ability to quarantine suspected files, scan hidden folders, etc. for those worried about privacy, the software uses a sandboxed environment to protect your pc while it scans. in fact, baidu even offers a self-destruct option. baidu antivirus offers two ways to block malware. one is to block its url, using a list of blacklisted urls supplied by the manufacturer. this list is fairly thorough, though it misses urls that we found that are well-known phishing sites. the other way is to block download attempts from malware sites using a web-based threat monitoring service. this is where baidu shines. in the latest version, it offers two services, one for incoming and one for outgoing traffic. while baidu antivirus is

reasonably effective at blocking malware, it has a few problems of its own. for one, its user interface has many bugs. also, it has a serious problem of false positives. during our tests, we found that baidu antivirus blocked a process that we knew to be malware-infected, but which baidu mistakenly identified as a legitimate program. that led to a false positive on the antivirus.

Download Free Baidu Anti Virus

baidu's a great cloud-based security suite, but it doesn't include the more comprehensive features of its enterprise edition. as a free version, however, it's a great option for those who want an all-in-one solution. baidu's a great cloud-based security suite. its free version doesn't come with the more complete features of its enterprise edition, but it's a strong free option for those who want a robust security solution. we also tested how baidu antivirus would deal with malware downloads from well-known malware-hosting sites. all of them successfully downloaded to the test system and executed. that's a big problem, since even if you install the program, you'll still be vulnerable to the malware contained within these files. mediocre malicious download blocking mediocre malicious download blocking baidu doesn't actually block downloads of malicious.exe files. it will block attempts to download the.exe

file as a downloader, but not as the actual executable file. it's not clear if it's the company's policy to avoid blocking a file that is already on your system. if baidu would block malware downloads, it would be the only antivirus product to do so. other products just ignore the downloading, and would either block the file or not block it, but not stop the malware once it's already on your pc. baidu's scores of 2.7 and 2.9 are below average for both categories. baidu has the lowest scores of any product i've tested on this test. baidu's behavior in this test is even worse than what it did in the prior free antivirus software for linux review. baidu didn't block any of the attempted malware downloads. worse, some of the attempts succeeded in downloading the malicious file. that's a big problem, since the company's product doesn't block malware downloads at all. a product that doesn't block malware downloads is a magnet for malware.
