Nfs Most Wanted 2013 Download [WORK] Utorrent

I just watched your how to download episode of help & you. I see that it worked well for some. Are you able to get the same results for me? Or can you provide some ideas on how to get it working for me? I have Ubuntu 15.10. To be clear, I was downloading the torrent using BitTorrent, and it was working fine. Then I went to download a file using Firefox, and nothing happened. I tried opening another download window to see if it would pop up, but I did that and nothing happened. I have tried toggling on and off the checkbox under 'when downloading a file from the internet' and hit the download button, but nothing happened. If you know a way of converting the.nfs files to.torrent, that would be great. I cant download them from a webpage, no matter what I do. I have them in Dropbox, and if I use their public link, they dont work. I made the files inside another folder, same size, so I dont know what it is. Please help Thanks for the suggestion. I downloaded with the Dropbox option first, then when I got a failure I tried it with the public link, and now I see my file with the name nfslive.torrent. When I click that, it opens the wrong file. I tried opening it in Utorrent but it failed. Hey guys! I was following your instructions on how to download the NFS series, but I'm getting the following error: "The action could not be completed successfully. The following error occurred: Unknown option: 4." I'm assuming that's because I haven't downloaded the torrent. But I don't know how to do that. Any help would be greatly appreciated!
