
PC Building Simulator - Overclocked Edition Torrent Download [Patch] [Extra Quality]

PC Building Simulator is a construction simulator where players get to design and build their own high tech PC in your custom workshop to meet their demanding specifications. The game allows players to select from a variety of different components that all relate to different functions of the PC. Once a player has selected all of their options they can put their PC into design mode and build it using a step-by-step interface. PC Building Simulator puts you in charge of making your own custom PC. Using real parts you must learn how your PC is put together by following a step-by-step guide. The instructions are easy to follow and if you get stuck in certain areas you can always go back and re-read the step-by-step guide. You can talk to your customers and show them your finished product on your workshop TV. In PC Building Simulator you get to customize your custom workshop with comfy chairs, items that are on sale, etc. all while you make your PC fit the task you have set it to do. If you need to repair your PC you can call your customers and have them over to repair your poor machine, this will make your customers feel great and you will get more customers which will make you get more money. When a customer is done with their PC, you can return their parts and start designing a new PC and starting the process again. As PC Building Simulator plays, you can also sell your own components, add design options such as a custom PC case, DDR4 memory, graphics card, HDD, CPU, and a range of other components. Customers can come by your workshop to choose and purchase your finished products as well as designing their own supercomputer, with only a few certain parts being available you will have to design a superb work of art with a small selection of parts.
