What I can tell you about those videos is that they are not heavily edited or even partially edited. They were clearly filmed with a PMDG gamepad, and most certainly are not using illegal software. They are also not using footage of a plane that is not theirs. They are presenting their own software running in a scenario built by PMDG, and as you can tell they are quite accurate. So why is everyone so confused? PMDG announced these new products in June of this year. While they did NOT reveal when they would be available, it was clearly NOT this August. Despite PMDG not revealing an exact release date, given the sheer number of changes between the previous retail version of the 737-700 / PMDG 'BC' FSX and its most recent retail version 'Scramble', it is almost certain that this will be the best and only retail release of the 737-700, hence the new releases and the videos. No, I didn't block you. I just wanted you to provide some evidence in your claims, and all you have done so far is attempt to insult me and only attack PMDG, which at best makes you look very foolish, and at worst malicious. I want to make one thing crystal clear: PMDG is a company that I have heard plenty of amazing things about, and in my experience, if you aren't having a good time with their product, it is very likely that they are keeping it to themselves so the value of the product stays high. The PMDG 737 NGX is a FSX add-on that allows you to experience the NC 11, its class, and its flight characteristics on the PC. It runs on Windows XP, Vista and Windows 7. The version 1.0.1 works fine. Can I have 2 copies of the same copy? My older copy of FSX crashes when i try to play the add-on. Can I copy the files to an external storage device and not use the FSX folder? Anyw...

The SW is free and easy to install, and it delivers all of the major improvements to the PMDG aircraft with the addition of surface textures and satellite imagery. The fourth quarter of 2010 was the busiest on record for PMDG, with 68% of the revenue resulting from sales of the 737 NG. The decrease in production by the major OEMs and in the OEM customer base due to economic conditions are leading to the tough market position that the PMDG Cessna dealer is facing. PMDG aircraft can be acquired by companies in the booming flight simulation industry as a part of their flight modelling or 3D renderment studio. The PMDG 737 offers a realistic model of the most important aircraft in its class, the 767-400ER, and has an unprecedented level of detail for an aircraft that has just 70 seats. The 737 is capable of the most demanding simulation of home movie and expedition flying. In the past, PMDG believed that the GMC dealer was more important than the Cessna dealer. However, today, the difference between the two segments is much smaller. The GA operations are run by an experienced team of professionals, and the PMDG dealer is now in the best position to be able to offer its clients the most-advanced features. 5ec8ef588b
