logixpro is our flagship software program. in addition to providing a comprehensive set of tools for mechanical engineers, process engineers, industrial process control system integrators and others, the program is also designed to be a reliable, stable, and easy-to-use simulator of rockwell automation plcs. the plc simulator is a fully independent software package that mimics the physical and operational characteristics of a real plc; the sequencing logic of a ladder-logic program; and the graphical presentation of the plc's window. this unique feature enables the user to work on a simulation of a plc system to get the feel and operation of a plc. the simulation not only simulates the physical, electrical, and mechanical aspects of the system, but also simulates the plc's programming environment with a world-class programmable ladder logic editor. the plc editor/emulator is designed to be completely stand-alone and work without the need for any other program. it is the software that allows a user to control the physical and operational aspects of a simulated plc. and because the plc emulator is not tied to a specific simulation, any simulation can be used with it. the plc simulator is not just for plc programmers. it is for anybody who needs to simulate and test industrial equipment and systems. in addition to mechanical and electrical engineers and process control system integrators, it can also be used by industrial process control systems integrators, production managers, purchasing agents, plant managers, and others involved in the industrial process control field. the plc simulator is available in a one-time license (through the internet) or a perpetual license.

LogixPro V1.6.1 Allen Bradley PLC Simulator 64 Bit

simulator cd: logixpro plc simulator is an ideal tool for practicing the fundamentals of rslogix ladder logic programming after you learn the basics with plc training course software. the look, feel, and operation of our ladder rung editor so closely mimics allen bradley software, that many need a second look to be sure who's editor they're using. (especially if you currently own a copy of rslogix 500 as you can open it from within the plctrainer.) logixpro 500 is the ideal tool for learning the fundamentals of rslogix ladder logic programming. the look, feel, and operation of our ladder rung editor so closely mimics allen-bradleys world renown software offering, that many need a second look to be sure who's editor theyre using. of course the give-away is the window containing one of our prosim-ii simulations. this is where logixpro really out-shines typical plc training setups employing a plc connected to a handful of switches and lights. by graphically simulating process equipment such as conveyors etc. in software, the synchronous and interactive nature of real industrial processes, presents the student with a far more realistic and challenging programming experience. the plctrainer version 4.32 uses a plc emulator with rslogix ladder logic look and feel and now includes analog instruction, an area that has been overlooked by most plc training materials. order now and receive a free cd logixpro, an rslogix logic simulator! (right-click, save target as plc training demo for a demo of an earlier demo version of the plctrainer. the purchased version is win 10, 7, 8, and xp compatible.) 5ec8ef588b
