What's New In?

Stellarium is an astronomical program for Windows that enables you to set up an imaginary flight, and view the stars and planets of the solar system from any location on earth. Based on the real positions of the stars and planets and the rotation rate of the Earth, Stellarium can calculate where these astronomical bodies are located in the sky at any given moment and allows you to view them in any direction. # Browser: Opera It is only natural that you want your computer to be a comfortable working environment, both as far as its performance and visual component are concerned, and there are many means of enhancing it. And while using a sleek screensaver might not influence your workflow in a direct way, it will definitely interfere with your mood. Stars 3 Screensaver is one such application that aims to simulate a star flight whose appearance you can tweak in quite a few ways. Enticing visuals simulating a space flight Stars 3 Screensaver is an elegant-looking solution for the times when you are away from your computer but still want it to display some attractive visuals in case your eye falls on the monitor. Boasting rich graphics, the program emulates a space flight, with stars coming in all shapes and colors and building up a complex universe, in which you sail across red giants, yellow, white, and blue celestial bodies, as well as black holes and gas clouds. With an impressive 30,000 stars being visible, the screensaver will prove to be a delight especially for space enthusiasts. Lets you customize your flight route The beauty of the application, though, is that you can adjust its settings in a way that will ensure an ideal mood. You can thus modify the stars amount and interstellar gas clouds density, the movement and rotation speed, the roaming frequency and amplitude. The screensaver also enables you to take a look at some antialiasing effects, putting at your disposal options such as "light," "sharp," "normal," "smooth," and "blurred." The animation smoothness can also be altered, as is the case with the video mode. What's more, you can also add a soundtrack to the screensaver. You can either choose a pre-defined one that is also accurate from an astronomical point of view or go for a track stored on your PC. Besides, you may ask the app to display a message of your choice and customize it. Eye-catching screensaver with nice graphics All in all, Stars 3 Screensaver is a smooth application that simulates a cruise in the sky, with realistic-looking celestial bodies surrounding you at all times. It enables you to adjust the entire experience and bring it closer to your liking, so

System Requirements For Stars 3 Screensaver:
