### What's New In XCAT - MP3 Cleanup?

MP3 Cleanup is a small application that enables you to manage your MP3s with a clean interface. With this you will have the opportunity to check the ID3v1/ID3v2 values of all your MP3s, delete the MP3s you do not like and delete the MP3s that have bad quality. This is a small application for those who have a lot of MP3s but want to easily manage it. This application is fully functional and can delete/add all MP3s located on a hard drive and manage MP3s found on USB, CD/DVD and Media. iTunes is a program to organize and manage your iPod, iPhone, or computer music collection. iTunes is designed to replace Apple's SoundJam MP, which had served that purpose since 2004, but was abandoned by Apple as the iPod touch and the iPhone were released. Although iTunes is installed as part of OS X by default, it is not a system component and does not require the Mac to operate. It can be removed or uninstalled without any adverse consequences. Features Importing iTunes can import any songs that are compatible with the iPod and iPhone. It can import using CD tracks, music files, or iTunes Radio. Importing iTunes can import any songs that are compatible with the iPod and iPhone. It can import using CD tracks, music files, or iTunes Radio. Alternatively, you can import your songs to iTunes by dragging them from your computer to the iTunes window. iTunes will then ask if you want to create a playlist from that folder or add the music straight into a playlist. Note: The first time you import music, it will appear in your music library in a new, blank playlist. You can access this playlist by double-clicking the playlist in the list on the left, and it will be available in the list on the right. To change the type of music you wish to import, simply click and drag the playlist to the appropriate list. The iTunes import dialog gives the following options: Import Options Import from: Location: This is where you select the music file that you want to import. iTunes can import all formats including.m4a,.mp3,.wav,.ogg,.aac,.wav,.m4a, and.mp3 files. Create: This allows you to add new music to your iTunes library. You can add both new tracks and music from CDs and music files. Create a playlist: This allows you to add new music to your iTunes library. You can create new playlists for the music you import and include the playlists in the list on the right. iTunes Radio: This allows you to access iTunes Radio if you have it enabled.
